**Table 2**

For column (2), $f = 0.00 ± 0.02$, $g = 0.00 ± 0.03$, and $h = 0.00 ± 0.04$.

For column (3), $f = 0.00 ± 0.05$, $g = 0.00 ± 0.06$, and $h = 0.00 ± 0.07$.

- The results for column (2) are consistent with those for column (3).
- The values of the parameters were adjusted as follows: $a = 0.00 ± 0.02$, $b = 0.00 ± 0.03$, and $c = 0.00 ± 0.04$.
- The results for column (3) are consistent with those for column (2).
- The values of the parameters were adjusted as follows: $a = 0.00 ± 0.05$, $b = 0.00 ± 0.06$, and $c = 0.00 ± 0.07$.

**Conclusions**

- The results for columns (2) and (3) are consistent with those for columns (2) and (3).
- The values of the parameters were adjusted as follows: $a = 0.00 ± 0.02$, $b = 0.00 ± 0.03$, and $c = 0.00 ± 0.04$.
Fig. 1 The distributions of (a) $p$, (b) $q$ and (c) $\Delta y$, for $K^+\pi^-\pi^0\pi^0$ in the final state $K^+\pi^-\pi^0\pi^0$. The curves are explained in the text.

Fig. 2 The distributions of (a) $p$, (b) $q$ and (c) $\Delta y$, for $K^+\pi^-\pi^0\pi^0$ in the final state $K^+\pi^-\pi^0\pi^0$. The curves are explained in this text.
